

Protect your business. Secure your data.

Continuity Centers provides co-location space, along with fully-managed data center operations within secure, carrier-neutral facilities in Woodbury, Long Island, and Chappaqua, NY. We also provide turnkey data storage, business continuity and disaster recovery solutions as a safe and affordable alternative for our members' functional remote data center operations.

- Co-location with secure Tier II and Tier IV data center space
- More than 35,000 square feet includes 25,000 square feet of 24"-height raised-floor environment
- 100% carrier-neutral connectivity from multiple providers
- Flexible data center space for single servers, cabinets, cages or private suites
- NFPA double-interlock pre-action fire prevention system with low-level smoke & heat detection (including pre-warning systems)
- Fully redundant power and backup systems with multiple generators, conditioned electric, UPS and generator backup
- 24/7 Network Operations Center Services
- Disaster Recovery and Business Continuity Services
- 24/7 Remote Hands support services available

Achieve valuable peace of mind.

Continuity Centers' co-location capabilities, along with our comprehensive suite of hosting and managed services, provide customers the perfect combination of security, reliability and peace of mind in knowing their systems are protected.

Relocate your staff, as well as your data.

Your data is protected, but where will your workers go if your building is shut down? Continuity Centers also offers nationwide Workgroup Recovery and has partnered with Agility Recovery Solutions to give our clients even more options.

2010 Planning Advantage: Spend \$1,000 or more per month with Continuity Centers, and sign up for our Readysuite Recovery Solution ReadySuite48 or above, and we'll provide five free seats at our Woodbury site (a \$200 monthly value).

Key Benefits

SECURITY

Controlled access & monitoring with manned security; multi-stage security filtration using biometric palm scanners and pass card access; mantraps, archived color CCTV monitoring; stringent access protocols and procedures

MONITORING

Stringent 24/7/365 monitoring & escalation using control rooms linked via VPN; 24/7/365 remote environmental monitoring

POWER

Uninterruptible, fully-conditioned electrical power at minimum N+1/99.999 service levels; fed from two utility grids and dedicated 1.5mW gas turbine co-generation plant; backed by dedicated Cummins diesel generator power; preferential fueling contracts; redundant UPS AC power backup with by-pass switch and surge suppression; DC electrical plants @ 48v with A/B feeds; full cabinet uses up to 80% of circuit's power; half cabinet uses up to 40% of circuit's power; half-cabinet has one circuit

CARRIERS

Lightpath, Data Net, Verizon, Keyspan, WBS, Sprint, Savvis, Global Crossing, Telia, Tiscali, BTN and others; all connections made within secure, centrally located Meet-Me Room; all forms of copper, fiber and coax connections available.

COOLING

N+1 built-in redundancy with 120%+ over capacity; redundant Leibert glycol-based dry cooler systems with Leibert computer-room air conditioning units offering minimum 120 sensible BTU per square foot maintained at maximum 48% humidity; down flow air distribution within raised floor environments

SPACE

Scalable, customized data center space including dedicated or shared locking cabinets, cages and dedicated private suites

CONNECTIVITY

Carrier-neutral high speed interconnection and peering including direct, physical layer connectivity to PTT, long haul, dark fiber, CLEC, IP transit, TDM/voice and VoIP; multiple dedicated fiber optic conduit entrances delivered within diverse building shafts

OTHER

Minimum live load floor capacities of 300 PSF; roof rights available; ample on-site parking; oversized freight elevators; NFPA double interlock pre-action fire prevention system with low-level smoke and heat detection
